

# OPEN HOUSE NOTICE

## PROPOSED BLUE RIVER PUMP STATION PROJECT

Kinder Morgan Canada (formerly known as Terasen Pipelines) is planning to increase the capacity of the Trans Mountain Pipeline System by constructing a new pump station in the Blue River area. A new pump station is required to increase the system's capacity to 260,000 bpd and ensure that Western Canadian petroleum products can be transported efficiently through the Trans Mountain Pipeline System.

## COMMITMENT TO PUBLIC CONSULTATION

Kinder Morgan Canada is committed to ensuring that issues and concerns raised by the public are considered in the project development planning phase. Public consultation activities will assist Kinder Morgan Canada in identifying impacts associated with the Blue River Pump Station Project and appropriate measures will be developed to mitigate these impacts.

To find out more about the proposed Blue River Pump Station Project please plan to attend our open house.
