

REX Open Season – Additional Capacity Update

On pages 2 and 3 of Appendix A to the Precedent Agreement (i.e., Rex East Election Page and Rex West Election Page) the bolded sentence states: “Additional upstream transportation costs including secondary out of path services on facilities leased from Questar Overthrust, and hub services will require incremental rates.” If these services are indicated, for a bid to be considered conforming these rates should be the maximum recourse tariff rates (e.g. for use of the leased facilities from Questar Overthrust the maximum recourse tariff rate is currently \$0.1274 per Dth.).
