

**ROCKIES EXPRESS PIPELINE LLC
ENTREGA GAS PIPELINE LLC
OPEN SEASON/CONTINUING NEGOTIATIONS
FOLLOW-UP INFORMATIONAL POSTING**

JANUARY 26, 2006

Rockies Express Pipeline LLC (“Rockies Express”), a Delaware limited liability company being jointly developed and owned by Kinder Morgan Energy Partners, L.P. and Sempra Pipelines & Storage, and Entrega Gas Pipeline LLC (“Entrega”), a Delaware limited liability company operated by Kinder Morgan NatGas Operator LLC, have now conducted successful binding Open Seasons for new interstate natural gas pipeline capacity. The Open Seasons closed on Monday, December 19, 2005 at 6:00 p.m. CST.

As previously announced, Rockies Express and Entrega are continuing during January to negotiate with parties that submitted non-conforming Precedent Agreements during the Open Seasons, as well as other parties which expressed interest but did not submit specific bids, in order to achieve a higher subscription level to the projects. As a result of those continuing negotiations, certain parties have now expressed interest in obtaining additional hub services and/or associated rate options at potential hub locations across the Entrega/Rockies Express contiguous pipeline systems. Specifically, parties have inquired into the potential development of Hub Services and/or rate options which would apply at various points in the Rocky Mountain natural gas production areas (including Meeker, Colorado), as well as points located further east on the pipeline system in the Mid-Continent area. Rockies Express and Entrega are considering those requests and intend to negotiate with parties to develop those additional hub-related services and/or rate options.

At this time, please be advised that Rockies Express and Entrega are considering the provision of a Meeker, Colorado Hub service or rate option, that would include additional compression, third party system interconnectivity and pipeline header services to allow natural gas deliveries into the Entrega system, which constitutes in large part, the planned Zone 1 of Rockies Express. Providing this Meeker Hub service or rate option would be dependent upon obtaining sufficient binding precedent agreement commitments, as determined by Rockies Express and Entrega, in their sole discretion.

Although our discussions have not led to a determination of all of the specific parameters associated with development of a Meeker Hub, Rockies Express and Entrega expect that the Meeker Hub service/rate option would be separately stated. The potential negotiated and recourse rates applicable to the Meeker Hub should be in the range of \$0.015 to \$.0500 per Dth (reservation charge based on 100% load factor), plus any applicable incremental commodity charge, plus actual, tracked FL&U (initially estimated to be approximately 0.15% to 0.4%). The Meeker Hub rate option would only apply to those receipts being tendered for additional service at the Meeker Hub, and would be additive to the any previously published Entrega, or Zone 1, Zone 2 and Zone 3 rates

published for Rockies Express, which specify the applicable charges associated with provision of transportation service to Clarington, Ohio.

Rockies Express and Entrega continue to explore other hub service or rate options, as parties indicate interest in such, across the systems. As such concepts may be developed, we intend to publish additional details of any service or rate offerings that may become available. Please continue to check our website at www.rexpipeline.com or via www.kindermorgan.com in order to obtain any information related to these continuing service developments.

As a reminder, any continuing negotiations which may result in additional Precedent Agreements executed with Rockies Express and/or Entrega, related to the above mentioned hub services or the projects in general, will not impact the rates, terms and conditions, or awards of capacity previously announced by Rockies Express and Entrega.

Please direct any questions you may have concerning the Rockies Express or Entrega projects to any of the following:
