

## PACIFIC OPERATIONS

### KMEP Policy Supplier Quality Certification

As a part of KMEP's quality oversight program, KMEP requires each supplier to provide a copy of a "Supplier Quality Certification" indicating quality analysis and regulatory compliance for each batch tendered to the pipeline for shipment for the categories shown. Included in the following sections are individual forms for:

- Conventional Gasoline - RVP
- Reformulated Gasoline
- CARB Gasoline/CARBOB
- Diesel/Biodiesel
- Turbine
- Arizona CBG/AZRBOB
- Nevada (Clark County) CBG

To ensure regulatory compliance and acceptance for pumping, the "Supplier Quality Certification" form must be received at the appropriate KMEP input location **at least 2 hours prior to gathering or pumping of the product, whichever occurs first.**
