Holdings LLC
a Kinder Morgan company

Bakken Missouri River Crossing Project Fact Sheet

Project Overview:

- The Bakken Missouri River Crossing Project is being proposed by Hiland Partner Holdings LLC, a Kinder Morgan company, to connect the existing Kinder Morgan Brogger compressor station located in Williams County, North Dakota, to a Kinder Morgan natural gas gathering system located in McKenzie County, North Dakota.
- The proposed Project will include the installation of approximately 10 miles of 20-inch diameter pipeline between the Brogger compressor station and Kinder Morgan natural gas gathering system.
- A portion of the route would cross beneath the Missouri River and the Lake Sakakawea Reservoir for approximately 2.5 miles using horizontal directional drilling techniques to minimize disturbances to the area.
- A number of federal and state agencies will be involved with the permitting and oversight of the Project including; the U.S. Army Corps of Engineers, U.S. Fish and Wildlife Services, North Dakota State Historic Preservation Office, North Dakota State Engineer, Natural Resources Conservation Service and Farm Agency, North Dakota Game and Fish Department, North Dakota Department of Health and Native American Tribes.

Project Benefits:

- The construction of the Project, expected to cost approximately \$30 million, will create an estimated 80 local jobs during peak construction activities and provide positive economic impacts from workers residing locally and relying upon nearby businesses, housing and support services. Local businesses would benefit from servicing these workers and the Project directly.
- When complete, the new facilities will capture approximately 180 to 240 million cubic feet per day of natural gas that would otherwise be flared into the atmosphere.

Project Schedule:

- Stakeholder Outreach: Ongoing
- Civil and Environmental Surveys: Completed
- Targeted Construction Start Date: Q2 2019
- Proposed In-Service Date: Q4 2019
